

## Computer Casing Front Audio Panel Connection

Keywords / Key Phrases: connect, sound blaster, front panel, sb

### Summary:

- ✓ **Applicable To:**
  - ✓ Sound Blaster X-Fi Xtreme Audio (SB0790)
  - ✓ Sound Blaster X-Fi Titanium Series (SB0888, SB0880, SB0886)
  - ✓ Sound Blaster X-Fi XtremeGamer (SB0730)
- ✓ All of the sound cards mentioned above feature the Intel High Definition Audio (Intel HD Audio) Front Panel header.

You can connect your sound card to your computer casing front audio panel via the 2x5 pin Intel HD Audio connector found on the edge of the sound card. It is only for Intel HD Audio Front Panel header and it will not support AC'97 connectors or proprietary computer manufactured casing.

Note: You will need to open up your computer casing to access the connector which might void the warranty. Please check with your computer manufacturer first.

For more information on the location on the sound card, you can refer to the user manual for the sound card found in the Installation CD or from our support page at <http://support.creative.com/>.

Details can be found in the article:

Pin assignment of the front panel connector on Sound Blaster cards
