

“What U Hear” not available in Windows Vista

Keywords / Key Phrases: what you hear, what u hear

To enable the “What U Hear” feature for your X-Fi Titanium series sound card, please download the latest driver version [2.40.0008](#) from the download section .

This driver will enable the “What U Hear” feature for you to record from multiple sources.

Do also follow the on screen instructions from the driver installation wizard to have the driver install into your PC system.
