

## Suggested Setup to Perform Decoding with your Playstation 3

Keywords / Key Phrases: decoder option is not available, decoder option is grayed out, input source, optical cable, dolby digital/dts spdif-in, no dts playback, bitstream options, dynamic range

It is recommended to connect the Playstation 3 digital output (optical) to an AV receiver and then output it via AV receiver speakers. The decoding will be done on the Playstation 3. By design, our X-Fi Titanium series sound cards currently do not have decoding options.
