

Unable to get Surround Sound with PowerDVD

Keywords / Key Phrases: surround sound, powerdvd, no surround sound, unable to get surround sound

Here are the steps to perform if you are unable to get surround sound with PowerDVD:

1. Click on the Configuration icon at the bottom right. A new panel will open.
2. Select the **Audio** tab.
3. Under the Speaker Environment, select **Use SPDIF**. This will disable the software decoding to allow the encoded signals to be processed by your digital speaker system.
