

Unable to record the effects from the EAX/Crystalizer

Keywords / Key Phrases: record effects, eax, crystalizer

If you are not able to record the effects that you have applied, this is most likely due to the recording source you have selected. To record with the effects, you need to select “What U Hear” as the recording source.

For instructions to select “What U Hear” as the recording source, please refer to the article below:

Recording from Line In or Microphone with Sound Blaster

<http://support.creative.com/kb/ShowArticle.aspx?sid=1540>

- Refer to the steps under Recording from multiple sources using “What U Hear”

Note: Crystalizer feature - Applicable to X-Fi series sound card models only
