

Enabling or Disabling the Voice FX and Silencer Features

Keywords / Key Phrases: voice fx, voice effects, silencer, enable, disable

Summary:

- ✓ **Applicable To:** Soundblaster X-Fi Titanium Fatal1ty Champion Series, Soundblaster X-Fi Titanium Fatal1ty Professional Series, Soundblaster X-Fi Titanium Professional Audio, Soundblaster X-Fi Titanium, Sound Blaster X-Fi Go! and Fatal1ty Professional Series Gaming Headset MkII.
- ✓ There are three requirements in order to have the Silencer and Voice FX features. First, you need to have any one of the sound cards stated above. Second, you need to have the MKII Gaming Headset. Third, you need to install driver version [2.17.0007](#) for Sound Blaster X-Fi Titanium series sound cards or driver version [1.01.0096](#) for X-Fi Go!.

Note: Install Creative Console Launcher version [2.61.35](#) for Sound Blaster X-Fi Titanium series sound cards.

Please open the **Creative Console Launcher** by going to **Start > Creative** folder and go through the following steps:

1. In **Entertainment Mode**:

- Click on the **Microphone** icon to open the **Microphone** effects window.

[Click to enlarge](#)

- You should be able to see where to enable/disable the **Voice FX** and **Silencer**.

[Click to enlarge](#)

2. In **Game** Mode:

- Choose **Settings**.

[Click to enlarge](#)

- Choose **Microphone Effects** tab. You should be able to enable/disable your **Voice FX** and **Silencer** here.
