

## Installing PowerDVD application

Keywords / Key Phrases: power dvd, bundled, powerdvd, where to download, powerdvd

**Note:** Please make sure that the CD is installed on supported Windows platform. The PowerDVD 10 software that is made available as web download in some of Creative's Sound Blaster products was developed by Cyberlink, it was not designed to support Windows 8. Users who downloaded the PowerDVD 10 are advised that it is not compatible with Windows 8; it may appear to install and run in Windows 8, issues may surface sporadically. While the PowerDVD version 10 may still work up to Windows 7, user who wish to use PowerDVD in Windows 8 are advised to purchase PowerDVD 12 and above from Cyberlink. Alternatively you may use other freeware software programs capable of DVD/Blu-ray playback and these are widely available on the Internet.

As PowerDVD is a third party application, the installation website link for the application will only be available once you have performed a full CD installation.

To install the PowerDVD application, click on the **Get PowerDVD** icon from the **Start Menu > Programs**.

Path: **Start > Programs > Creative > Sound Blaster X-Fi > "Get PowerDVD"**.

Upon clicking, you will be redirected to the download page for PowerDVD application. Download the file and install the application using the downloaded file. Follow the on screen instructions to have the application installed into your PC system.

If the **"Get PowerDVD"** icon is not listed in the **Start Menu**, it is recommended that you uninstall the soundcard from the installation cd, followed by a re-installation. Please be reminded to do a full installation and not a custom installation.
