

## Unable to record audio from the website

Keywords / Key Phrases: record, recording, website, audio

You will need to select “What U Hear” as the recording source to record audio from the website instead of the input sources such as Line-In/Mic-In. For instructions to select “What U Hear” as the recording source, please refer to the article below:

Recording from Line In or Microphone with Sound Blaster

<http://support.creative.com/kb/ShowArticle.aspx?sid=1540>

- Refer to the steps under Recording from multiple sources using “What U Hear”

You should be able to record sound from the website. However please take note that all sound you hear from the speakers will be recorded. Thus it is recommended that you turn off the Windows sound and applications that output sound such as the instant messengers.
