

## No Decoder Option on Sound Card

Keywords / Key Phrases: no decoder, decoder, dolby digital, dts decode, power dvd, decoding, serial number

If the sound card does not come with a built-in decoder, then no decoding options will be available. As the sound card is not capable of Dolby Digital / DTS Decode, you can use software to handle the decoding such as **Power DVD** to decode the Dolby Digital/DTS signal from the DVD.

For more information on DVD playback, please refer to the Solution ID **26947** entitled [Watching DVD with a PC](#).
