**Note:** Creative Bluetooth speakers do not need any driver to operate. You may need to update the Bluetooth driver of your computer's built-in Bluetooth adapter or your USB dongle. To determine whether your computer or USB dongle is updated with the latest Bluetooth driver, please refer to their user's guide or website for information.

For Sound Blaster X7, Windows 10 may attempt to unmute the microphone monitoring when the installation is completed, which can cause feedback. It is suggested to uninstall the current software and driver, before upgrading to Windows 10 and installing the products's new software.

**Legend:**

\* - Existing package works on Windows 10
