

How to Resolve Error Code 43 in Device Manager for Creative X-Fi Sound Cards

Keywords / Key Phrases: Windows has stopped this device because it has reported problems, Code 43

If you have installed your device and it was working previously when you encountered an error message in the device manager "Windows has stopped this device because it has reported problems. (Code 43)", check the following troubleshooting steps to resolve the issue:

1. Reinstall the drivers for the audio card. If it is an MP3 device, perform a recovery mode and try again.
2. Download and install the latest drivers for your audio and webcam devices. For MP3, download and install the latest firmware
3. Test the device in another pc with the same specifications where possible. If the error does not persist, uninstall the device from the previous computer and reinstall it using updates from <http://support.creative.com>. Otherwise, contact technical support for further assistance on the hardware
